KARTHICK RAJASEKARAN
LinkedIn | GitHub

Software Developer with experience building scalable web applications using JavaScript, TypeScript, Java and C#. Experienced across the full software development lifecycle, including frontend development, backend APIs, workflow automation and cloud-based solutions. Focused on writing reliable, maintainable software and continuously improving technical skills through challenging projects.

SKILLS

- **Languages:** JavaScript, TypeScript, Java, Python, C#
- **Frameworks & Runtime:** Vue.js, React, Angular, Node.js, Spring Boot
- **Databases:** SQL Server, MySQL, PostgreSQL
- **Tools:** Git, Docker, jHipster, Liquibase, Camunda
- **Cloud (AWS):** EC2, RDS, Lambda, S3, ELB, Route 53, CloudFormation, IoT Core

WORK EXPERIENCE

Software Developer – Nukon, Brisbane **Sep 2022 - Present**

- Developed and maintained a full-stack web application using Vue.js and Vuetify (1.5 & 2) for the frontend and Java 8 with Spring Boot for the backend.
- Utilised jHipster to scaffold full-stack application code and Liquibase to manage and version database schemas across environments.
- Designed and implemented business process workflows using Camunda BPMN Modeler, automating multi-step processes across the application.
- Implemented an IoT-based people counting solution using Axis Camera Station Edge, integrating camera events with AWS IoT Core via MQTT to track entry and exit counts in real time.
- Managed and queried relational databases using MS SQL Server and PostgreSQL, supporting backend data operations and reporting.
- Monitored application health and performance by building dashboards, metrics, and alerts in Datadog.
- Built frontend interfaces and operational dashboards using Ignition and Grafana for real-time data visualisation.
- Wrote and maintained end-to-end automated tests using Cypress to ensure application reliability and catch regressions across key user flows.

Frontend Developer – The Spec Sheet, Sydney **May 2022 - Aug 2022**

- Contributed to the design and development of UI/UX interfaces using React and TypeScript.
- Used MobX for state management, react-query for data fetching, and react-hook-form for form validation.
- Assisted in bug fixes and performance improvements across the application.
- Conducted cross-browser end-to-end testing using Playwright.

Software Developer – Enablo, Brisbane **Nov 2020 - May 2022**

- Provided professional development services to Enablo and its clients by building scalable solutions to Workplace from Meta (Facebook) in the form of automations, bots and other custom integrations.
- Designed and implemented full stack features using Node.js with Sequelize ORM for backend services and React.js with Ant Design, functional components and Hooks for frontend UI development.
- Automated unit tests using Jest and Mocha to ensure the system performs according to the specification and build process using Docker setup for prod and dev environments.
- Maintenance of CI/CD pipelines in Gitlab to ensure every code change will go through standard process of software lifecycle before it can make it to the production environment.
- Adhered to Secure Development Policy, including the maintenance of projects to ensure packages used were not vulnerable using Snyk.
- Provisioned and managed cloud infrastructure across Azure using Terraform and AWS using CloudFormation.
- Provided ongoing customer support for all Enablo solutions to our customers and users.

Systems Engineer – Tata Consultancy Services, Chennai **Oct 2015 - Aug 2018**

- Provided production support and ensured application stability for enterprise web applications built using C#, ASP.NET (MVC, Entity Framework) and MS SQL Server.
- Performed root-cause analysis for production incidents, conducting log analysis, debugging and database troubleshooting to deliver timely resolutions within defined SLAs.
- Monitored production environments and system health using Dynatrace and Splunk, identifying performance issues and driving code and query optimisation.
- Performed code analysis and debugging, database maintenance and performance tuning using MS SQL Server and managing release within team.
- Contributed to continuous improvement initiatives, documented support procedures and mentored onboarding associates on troubleshooting, debugging and web development workflows.

EDUCATION

Masters in Information Technology **July 2018 - July 2020**
Monash University, Melbourne, Australia

Bachelors in Computer Science and Engineering **June 2011 - Apr 2015**
Anna University, Chennai, India

VOLUNTEER SERVICE

Orientation Volunteer, Monash University **Feb 2019 - Feb 2019**

- Assisted in running international student orientation events by communicating with students and supporting event setup and coordination.

Event Organizer, Tata Consultancy Services **July 2017 - Aug 2017**

- Organized awareness events under the "Rigor in Operations (RiO)" initiative to promote discipline, consistency, rules, and framework-driven processes in operations
